Get credit for your work!

If you are taking a course that assigns CodeStepByStep problems for credit, make sure to go to the **Courses** page and add the courses you are taking, so that your instructor or TA can see your work and give you credit.

Also make sure that you have your **School field** set properly, or else your instructor might not be able to see you in their results page. Be careful because some schools are in the list multiple times with similar names, such as "U of Washington" and "University of Washington". Make sure to choose exactly the school name that your instructor tells you to choose, or they will not be able to see your progress.
